

“Ultra” Regal Geranium Selections

A science-based crop selection program that delivers early spring color, consistently, in a crop that has strong consumer acceptance!

A crop selection program designed to produce a full range of colors in Regal Geraniums that are uniform in flowering time, habit and flower display at finish.

Variety Selections are:

Ecke Geraniums, LLC has taken the guesswork out of the popular Regal Geranium series. Growers can accurately time the finish on Regal Geraniums based on temperatures and light. Maximize your retail potential on one of the most sought after early spring color crops.

In addition to the uniform crop timing in the greenhouse, the consumer will be able to enjoy flowering on these varieties longer as the advances in genetics enable these varieties to flower in warm temperatures and with moderate humidity levels.

“Ultra” Regal Geranium Product Forms
